Expanding offshore wind energy in Poland Major contract: PORR to build factory for wind turbine components in Szczecin

Warsaw/Vienna, 19.12.2024 - Windar Renovables S.A., a world leader in wind turbine tower manufacture, has charged PORR with building a new factory in Ostrów Grabowski in Szczecin. The factory will produce towers, masts and foundations for the next generation of wind turbines. The complex will take 18 months to build.

The construction project in Szczecin is a further milestone in developing the offshore wind energy sector in Poland. PORR CEO Karl-Heinz Strauss sees high demand: “The need for alternative energies in Europe is huge and continues to grow. And so it’s imperative that the appropriate infrastructure is expanded. We are proud to contribute to that with the construction of this plant”.

The plant, which is being built on a 17-hectare site in the port of Szczecin, will manufacture towers, masts and foundations for the next generation of wind turbines. The most important part of the factory is the main building; with a total area of more than 47,000m², it will house four production lines for wind turbine towers along with a warehouse for the necessary raw materials. An additional, smaller building is planned for the assembly of the internal components. A total of more than 3 hectares of land will be developed for storage areas, along with access roads and parking for 100 vehicles. PORR will complete the work within 18 months.

Installation terminal in Świnoujście

PORR is a major player in the expansion of offshore wind energy in Poland. In Świnoujście, for example, it is building the hydrotechnical section of a pioneering installation terminal that will service Polish wind farms in the Baltic Sea. Scheduled to open in 2025, it will be the first terminal of its kind in Poland and one of the most advanced in Europe.

Facts and figures at a glance:

Project type:	Industrial construction
Scope of services:	Construction of a factory for components for wind power turbines including main building, auxiliary building, warehouses, access road and parking
Client:	Windar Renovables S.A.
Contractor:	PORR S.A.
Completion:	Q2/2026

About the PORR Group

Top performance driven by innovation - that is what PORR has embodied for over 150 years. With around 21,000 employees and production output of around EUR 6.6 bn (business year 2023), PORR is one of the largest construction companies in Austria and among the top players in Europe. As a full-service provider, PORR offers every aspect of building construction, civil engineering and infrastructure construction across the entire value chain. The focus is on the home markets of Austria, Germany, Switzerland, Poland, the Czech Republic, Slovakia and Romania. PORR also works in selected international project markets such as Norway, the UK and Qatar. The PORR share is listed in the prime market segment of the Vienna Stock Exchange.
